RESUME FOR THE COMPANIES

ChatBot with whatsapp interactions:

Planning and requirement:

Define the specific requirement and objectives of the project, including resume screening criteria, interview scheduling process, and integration with whatsapp and outlook calender.

Gathering input from the recruiters, hiring managers, and potential users.

Technology Selection:

Choosing appropriate technologies and framework for building the chatbot such as Microsoft bot framework, etc…

Development environments resume parsing natural language processing (NLP), and integration with whatsapp and outlook calendar APIs.

Compliance with whatsapp business API guidelines.

Resume screening and scoring:

Develop or integrate a resume parsing tool to extract relevant information from resumes submitted by candidates.

Define criteria for scoring resumes based on job description, such as skills, experience, education, and qualifications.

Implement algorithms or model for automated resume screening and scoring, considering both efficiency and accuracy.

Chat bot development:
